

Methylquecksilber schädigt Feten aus mütterlichen Amalgamfüllungen

Exposure to Methylmercury often occurs from methylation of inorganic mercury from amalgam-fillings through gastrointestinal bacteriums

vgl. Björnberg, K.A., Vahter, M., Englund, G.S.: Methylmercury, Amalgams, and Children's Health. Environmental Health Perspectives 2006 March; 114(3): A149–A150.
