Amalgam indictment of the Federal Republic of Germany for being responsible for lethal mass poisoning with mercury through dental amalgams

Violation of article 2 of the German Constitution „Right to life and physical integrity“

Honorable High Court!

1. After 20 years of fighting without avail for a national ban of dental amalgam I hereby press charges against the Governmental Health Authorities because of failure to act. As early as 1898 was my grandfather from amalgam explorers only reached, that a slightly less toxic formulation was used. In 1988 we started warning against the potential serious consequences of amalgam, in 1989 the use of amalgam was declared as medical malpractice, in 1992 a handbook on the intoxication with amalgam (consisting of 3 volumes and 15 amendments) was published, containing facts and evidence of 20.000 patients poisoned or even killed by amalgam fillings. In 1995 we propagated the warning given out by the German Government that amalgam may cause lethal allergic reactions in healthy rats, but the EU, WHO and UNO remained inactive despite desperate pleads for a national ban.
2. Amalgam represents the most serious chemical disaster with an estimated number of 450.000 deaths in Germany. Thus, the death of one out of two Germans involves amalgam poisoning.
3. Amalgam fillings contain 50% liquid mercury, which is highly volatile and is stored in brain tissue. Due to the criminal negligence of not using a proper lining mercury is also stored in the jaw and causes poisoning of the whole organism.
4. Mercury induces blocks in about 80 positions of neuronal and immunological metabolic pathways, with detrimental long-term effects:

TOXCENTER e.V. Hugo Junkers-Str. 13 ; 82031 Grünwald
Postbank München BLZ 70010080 Konto Nr. 111275808

Vize- Präsident Gunther Daumenlang
Wissenschaftliche Leitung
Dr. med. Dr. med. habil. Max Dauderer

5. Neurological damage, ranging from behavioural abnormalities to **multiple sclerosis, schizophrenia**, amyotrophic lateral sclerosis, **sudden infant death** and **Alzheimer's Disease**.
6. Immune damage, ranging from immunodeficiency to **lethal bacterial** or viral **infections, kidney failure** or **cancer**.
7. Infants are poisoned by mercury during the pregnancy of their mothers and die of sudden infant death.
8. Mercury and other metals contained in amalgam fillings lead to allergies and autoimmune diseases capable of destroying virtually every organ in the body, with ultimately lethal outcomes.
9. Doctors and dentists are not aware of the risks and the correct treatment procedures and do not opt for alternative materials. Removal of amalgam fillings is performed without the essential measures of precaution („triple protection“, removal under oxygen) leading to acute and sometimes lethal mercury poisoning.
10. For decades now healthier alternatives have been available, such as cheap synthetics or expensive ceramics.
11. Patients are not informed about the risks to their health. Adults and even small children are thus engrafted a poisonous substance without informed consent.
12. Patients who wish to have the poisonous materials removed have to overcome enormous, hazing obstacles, even if they can prove to suffer from health damages.
13. This policy of sanctions by the state authorities reminds one of targeted **homicide**. All consultants appear to subordinate to this malicious state mandate.
14. Dentists obtain mercury cost-free, because this makes recycling of old batteries less expensive.
15. The only material covered completely by health insurances is the toxic amalgam.
16. There is no authority in Germany, including the attorney general, feeling responsible for the prosecution of offenders, not even if the outcome of the poisoning is lethal.
17. Reactions and autoimmune test positive for amalgam.
The dental mercury poisoning is a deadly allergy disease.

Honorable High Court,

because of the severity of the consequences of mercury poisoning in 1988 with an annual use of 80 tons of material for odontology in the European Union, because the use of mercury in tooth fillings

- **severely harms the dignity and sanity of man**
- **is responsible for more deaths than the wars of this century**
- **the deception and disinformation of the victims has become unbearable**

I desperately urge you, as a clinical toxicologist and environmental doctor, because the German Government refuses to take action to immediately bring an end to the injustice, to punish the offenders and to recompense the victims! We will provide expert advice and facts whenever required.

The matter is urgent, because every day more patients are being poisoned in more than 70.000 dental practices in Germany.

Yours respectfully

Dr. med. Dr. med. habil. Max Dauderer
Internist, Umweltarzt Habilitiert als
Klinischer Toxikologe
