EMANUEL RECIVI, M.D.
Scientific Director
1 5 . 0 2 . 8 5

Memorandum to the World Health Organization
Geneva, Switzerland

In a meeting with Dr. Max Daunderer, toxicology consultant in the Bhopal industrial accident, on Wednesday Feb. 13, Dr. Emanuel Revici discussed the basics of his research, work and its many applications.

In the course of the discussion. Dr. Daunderer inquired as to whether Revici's work might have application in the Bhopal problem. In response I have prepared a short summary of Dr. Revici's work, having studied and collaborated with him over the last five years.

If you feel we can be of assistance to you in the management of this problem, please contact us through Dr. Daunderer. Dr. Revici will be in Munich until the middle or end of next week, then returning to New York, where he lives, practices, and carries on research. I will be going to New Delhi on Feb. 20, to meet with the Dalai Lama on Feb. 24, regarding another project.

Sincerely,
Dwight L. McKee M.D.
